- Spousal consent form for waiver of QJSA

Report formats may be customized by the user:

- User-selected graphic logo
- User-selected report set
- User-created footnotes
- User-adjustable margins, shading and gridlines

Why do Benefits Professionals use BenForms?

The user interface requires minimal data entry to calculate benefit amounts payable at any date or age under a multitude of forms including lump sum payouts subject to IRC417(e) using segment rates. The system optionally calculates the IRC415 maximum benefit payable at each date and under each form. Values are illustrated in a pdf format document for easy comparison of the options available to a participant.

Benefits Professionals use BenForms to provide participant statements that illustrate the QJSA benefit; the dollar amount of benefit payout options; the value of the payout options relative to the QJSA and the appropriate consent form for completion by the participant and spouse.

BenForms assists in determining benefits for QDROs.
